

Adsorption of Heavy Metals Using Biochar and Hydrochar - Demonstration Evidence Review

SciReview Chem - Systematic Literature Review & Evidence Synthesis Workbench

This report documents the tracked workflow. It does not generate scientific conclusions or replace reviewer judgment.

DEMONSTRATION DATA - NOT REAL RESEARCH EVIDENCE

Research question

In fictional aqueous systems, how are demonstration biochar and hydrochar materials characterized and evaluated for heavy-metal adsorption?

Review objective

Demonstrate a transparent evidence-review workflow using wholly fictional records. No scientific inference should be drawn.

Review type

Systematic

Scientific domain

Environmental chemistry and adsorption - demonstration only

Inclusion criteria

Clearly labelled synthetic primary study; Aqueous metal adsorption outcome; Biochar or hydrochar material

Exclusion criteria

Wrong fictional material system; No adsorption outcome; Review or commentary format

Search strategy

Database	Date	Records	Exact query
DemoIndex	2026-09-20	34	("DEMONSTRATION biochar" OR "DEMONSTRATION hydrochar") AND (adsorption OR removal) AND (lead OR cadmium OR copper)
Other/manual	2026-09-20	6	Fictional portfolio seed records supplied with SciReview Chem

PRISMA flow

Adsorption of Heavy Metals Using Biochar and Hydrochar - Demonstration Evidence Review

Counts derived from tracked records and current reviewer decisions

Reconciled and complete

Included-study evidence

Included studies: 20. NR indicates not reported or not extracted and is not treated as zero.

Title	Year	Journal	Doi
DEMONSTRATION Study 017: Cellulose Hydrochar for Fictional Chromium Adsorption	2019	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 018: Bamboo Biochar for Fictional Zinc Adsorption	2020	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 019: Pine Biochar for Fictional Lead Adsorption	2021	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 020: Rice Husk Biochar for Fictional Cadmium Adsorption	2022	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 021: Algae Hydrochar for Fictional Copper Adsorption	2023	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 022: Coconut Biochar for Fictional Nickel Adsorption	2024	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 023: Cellulose Hydrochar for Fictional Chromium Adsorption	2025	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 024: Bamboo Biochar for Fictional Zinc Adsorption	2018	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 025: Pine Biochar for Fictional Lead Adsorption	2019	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 026: Rice Husk Biochar for Fictional Cadmium Adsorption	2020	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 027: Algae Hydrochar for Fictional Copper Adsorption	2021	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 028: Coconut Biochar for Fictional Nickel Adsorption	2022	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 029: Cellulose Hydrochar for Fictional Chromium Adsorption	2023	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 030: Bamboo Biochar for Fictional Zinc Adsorption	2024	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 031: Pine Biochar for Fictional Lead Adsorption	2025	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 032: Rice Husk Biochar for Fictional Cadmium Adsorption	2018	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 033: Algae Hydrochar for Fictional Copper Adsorption	2019	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 034: Coconut Biochar for Fictional Nickel Adsorption	2020	Journal of Fictional Adsorption Demonstrations	NR

Title	Year	Journal	Doi
DEMONSTRATION Study 035: Cellulose Hydrochar for Fictional Chromium Adsorption	2021	Journal of Fictional Adsorption Demonstrations	NR
DEMONSTRATION Study 036: Bamboo Biochar for Fictional Zinc Adsorption	2022	Journal of Fictional Adsorption Demonstrations	NR

Researcher synthesis notes

DEMONSTRATION DATA - NOT A REAL SYSTEMATIC REVIEW. The fictional dataset frequently reports adsorption capacity and model fitting, while regeneration and BET data are intentionally missing in some records. These patterns demonstrate software behavior and are not scientific findings.

Reproducibility information

Project schema version: 1. Generated locally by SciReview Chem. Raw imported metadata and decision histories remain in the project file.
